

Training in Water and Sanitation for Development and Emergencies

Facilitators: Eric Fewster (co-founder of BushProof), and Nikki Shaw (Technical Adviser to World Toilet College - WTC).

Eric Fewster, BA, MSc, has wide and extensive technical expertise in the NGO and business water and sanitation sector. Eric has more than 10 years experience in implementing, managing and evaluating WatSan projects in many countries, largely in emergency settings. This practical field experience has allowed him to facilitate several trainings. Eric is used to the reality of project situations where material and human resources are usually limited, and feels that there is a solution for any problem. Eric holds a Master's degree in Water and Environmental Management.

Nikki Shaw, MA, MSc, CEng MICE HKIE. With a career in civil engineering spanning two decades and five continents, Nikki has extensive expertise in water and sanitation engineering in both industrial and developing countries. Her experiences include being responsible for designing and/or upgrading rural village water supply systems for more than 20 villages in

Botswana, designing small sanitation systems for rural or peri-urban areas in Africa and SE Asia, and advising an NGO on water and sanitation works in SE India following the 2004 tsunami. Nikki has co-facilitated BushProof training courses run in Hong Kong SAR and Singapore, and is now a freelance consultant in Singapore, currently consulting to a large multi-disciplinary engineering firm, as well as technical adviser to WTC.
